Chapter 7	Rewrite, address issue. Walter Kozlowski review:	GSMA	K	Karine Sevilla to create a list of sections needed assistance
Security	 Need to add a shared security model in a diagrammatic form? Can be post Baraque if too hard now. 7.4.1.2 - need to divide into subgroups of related requirements Need to de-duplicate 7.4.1.2 and 7.4.2, for example introduce a Common requirements group in 7.4.1.2 and refer to it in 7.4.2, and then add specifics for backup-end security 7.6 (operator's workload responsibility) is different from 7.4.1 (operator's platform responsibility). 7.9, 7.10, 7.11 need to be reviewed in detail by a security expert; Amy Zwarico can you assist? 	feedback Issues: 1754, 1755,	ar ine	and request help from the group Clean up issue#1881 CLOSED -> PR #1882 MERGED But the chapter still needs review and clean up for: • section Root of trust: right place? WK: looks OK to me • 7.6 content somehow redundant with 7.4.1 and a lot of details, e.g. on RTM, is it necessary here; WK: see (6) in the left column • 7.4.1.2: list presentation could be enhanced, WK: agreed, see (3,4) in the left column Walter to contribute to resolve these issues
