 - Network specification - [Tom Kivlin](#) proposal to replace table 4-5 with a diagram that shows the architecture, with an associated table showing which part of the architecture deals with each requirement. e.g. I don't think it's relevant that the multiplexer has to provide Network Policies as existing CNI plugins that the multiplexer calls can (and perhaps should) deal with that. (Do we need a "Unix" principle - "do one thing, well"?)
 - [Tom Kivlin](#) to create an issue on the backlog
