 - Frederick to present a quick NSM intro in one of the future meetings
 - Stale issues - propose we close if in To-do and no PR created after ?? days/weeks/months
 - No objections - [Tom Kivlin](#) to create proposal
 - Network specification - [Tom Kivlin](#) proposal to replace table 4-5 with a diagram that shows the architecture, with an associated table showing which part of the architecture deals with each requirement. e.g. I don't think it's relevant that the multiplexer has to provide Network Policies as existing CNF plugins that the multiplexer calls can (and perhaps should) deal with that. (Do we need a "Unix" principle - "do one thing, well"?)
 - [Tom Kivlin](#) to create an issue on the backlog
