2020-10-15 - ODL - Kernel Projects' Aluminium post-mortem and Silicon lookahead

Topic Leader(s)

- Robert Varga

Topic Overview

Aluminium's actual deliverables were dominated by new features and improvements made at the core platform level. We will review the changes and examine their interplay with plugin/application projects, what went wrong, what went right and how we can improve in the future. Since we have the MRI deadline looming, we will also take a look at what the focus is there.

Slides & Recording

Minutes

We went through the presentation, with few questions being asked.

Tejas Nevrekar asked about how to integrate odlmicro with infrautils and we have a mailing list thread on that. The ball is in odlguice's court now.
