2020-10-15 - ODL - Platform projects' and Simultaneous Release mechanics

Topic Leader(s)

- Robert Varga

Topic Overview

Our MRI:MSI split is currently 5:12 and is likely to become 7:10, with some use cases being delivered solely by MRI projects. This opens up new possibilities for how we do integration and deliver features to our users. We will do some analysis of where we can go, seek some input on interest and generally discuss what we want to do.
