## Minutes

**NFV testing white paper** - [Lei Huang](#) to arrange a separate session for reviewing modifications to the white paper

### SDN survey

- [Ahmed ElSawaf](#) reviewed the materials on the SDN survey from virtual event
- [Beth Cohen](#) What are the key insights?
  - Open source in LFN is addressing a good share of the market with ODL and TF
  - ODL addresses needs of data centers and MPLS
  - Perhaps LFN should make it more clear that LFN offerings address most of the needs of SDN controllers
  - From the survey, where should we be focusing?
    - Should we encourage TF to support other requirements?
    - SDN adoption white paper in Q2 2021?
- [Lei Huang](#) Look to produce a white paper later in 2021?
  - Lead with the analysis
  - Perhaps a tech brief - not a full white paper?
    - More analysis of the survey and provide guidance to TF and ODL

### Intelligent network and AI survey

- [Lei Huang](#) and [Beth Cohen](#) simplified the survey
- Next steps
  - [Jim Baker](#) produce a survey monkey for review with [Lei Huang](#) and [Beth Cohen](#)
  - Distribute to EUAG only
