LFN Community Workspace: Surveys

The goal of this wiki page is to increase the transparency, engagement, collaboration, and utility of surveys emanating from LFN communities (LFN staff led, committee led, working group led, etc). Best practices are being developed to be applied across all surveys to help ensure consistency, data integrity, visibility across the community, and optimal cross-promotion while minimizing errors, duplication, confusion, and silos. If you are interested in conducting a survey in the LGN Community, please contact Brandon Wick.

LFN Survey Best Practices
