    - close this as soon as possible to have the tables in the correct place in the master branch

    - Riccardo Gasparetto Stori to edit ra2.ntw.007 to include both sriov and vswitch-based acceleration. verb to be changed to "MUST".
    - PR2105 and 2014 to be dropped as per https://github.com/cntt-n/CNTT/issues/2134
  - Exception to the 3-version-rule for Kubernetes support to be formulated and included - this is due to a zero-delay between community releases and the application of the rule, and network operators having slightly longer lead times to deploy.
