

2021-02-04 - Anuket - RM: Load Balancing in the Infrastructure

Topic Leader(s)

- [Per Andersson](#)
- [Gergely Csatari](#)

Topic Overview

I will discuss the problem with how to deal with load balancing in two very different type of systems, Openstack and Kubernetes. I will also touch on the problem that the networking semantics are completely different in the two systems

Slides & Recording

[2021-02-04 07:59:06 Virtual Developer and Testing Forum 98774346866.zip](#)

Minutes

- [Gergely Csatari](#): [Slides](#) about Kubernetes network orchestration by [Tal Liron](#) . To join the discussion please join #tug-networking-orchestration in CNCF Slack.
- RA2 have a gap about a missing Kubernetes network API: https://cncf.readthedocs.io/en/latest/ref_arch/kubernetes/chapters/chapter06.html#dynamic-network-management
- Notes of the #tug-networking-orchestration are here <https://hackmd.io/@cnf-wg/r1K1SaSxu>

Action Items

- ☐ [Gergely Csatari](#) to discuss with #tug-networking-orchestration regarding collaboration
- ☐ [Walter Kozlowski](#) to add to the RM agenda: Discuss at RM how to define network
