

2021-02-04 - Anuket - Gitlab Pilots and LF IT roadmap

Topic Leader(s)

- [Trevor Bramwell](#)

Topic Overview

Review the roadmap for how Anuket can transition to Gitlab, and hear from projects in the pilot program currently evaluating the platform.

Minutes

Feedback from Pilots

StorPerf

- Cleaner branching with CI files - CI comes over
- More intuitive workflow with builds and code tied together
- Non-Author Code Review easy

KubeRef

- Easy to use
- Haven't done a straight comparison with Gerrit
- Need to implement gating to be able to compare

Issues to address:

- Gerrit vs. Gitlab reviews - Does Gitlab's review system provide the same power/usability as Gerrit?
- Gating - Can we ensure the same gating as we have with Jenkins?
- Triggers - Are we able to trigger in the same methods (Merges, tags, comments, schedules, etc.)

Discussion to continue in Anuket Technical meetings.

Action Items
