2021-02-03 - Anuket - Beyond IaaS/CaaS for Cloud Infrastructure in RM

Topic Leader(s)

- @Petar Torre
- @Pankaj Goyal
- Walter Kozlowski

Topic Overview

When Cloud Service Providers, restrict the services provided to only IaaS/CaaS, then developers make independent choices increasing integration and certification effort, time and cost. For Telco's, this results in increasing the onboarding, certification and operational costs. This session will be used to explore whether the RM, and subsequently the RAs, should specify a set of commonly used software services and steps in accomplishing the task.
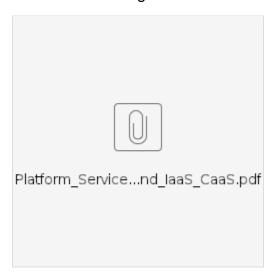

Session Details

When: Wed Feb 3 2021, 13:00 - 14:00 UTC

Zoom link: https://zoom.us/j/98774346866?pwd=T0l2ajJUdUtISm5jeWQvSW5sNE5iUT09

Slack: Anuket (anuketworkspace.slack.com) #rm channel

Slides & Recording

Platform_Service...nd_IaaS_CaaS.pdf

Recording of the Session (Video + Audio): Beyond-IaaS-CaaS-2021-02-03-playback.m3u

Recording of the Session (Audio only): Beyond-IaaS-CaaS-2021-02-03-audio-recording.m4a

Minutes

- Comment on slide 5: Runtime and Networking listed under RA2 are components needed to run Kubernetes cluster and are not Platform Services.
- Comment on slide 12: Everything listed beyond "Harbor" are not Platform Services. For Image Registry defined API and not project (Harbor, Docker) and version?
- Relation with XGVela and common understanding of what constitutes General PaaS; XGVela Architecture.
- Common survey with XGVela on services and projects; use LFN for conducting survey.
- EUAG AI/ML survey has some information about the services that the community is looking for to create AI/ML tools. This will help with the requirements gathering for the services needed in the container stack.
- XGVela meetings are 1PM UTC Tuesday and Friday.

Action Items

- [ ] Saad Ullah Sheikh to discuss with XGVela team
- [ ]

- [ ] RM to create sub-team and hold meetings with XGVela
- [ ] Anuket and XGVela to align views on General PaaS
