2021-02-02 - ONAP: TSC Task Force- ONAP For Enterprise Business

Topic Leader(s)

- Catherine Lefevre
- TSC Task Force

Topic Overview

What does ONAP offer to an enterprise customer (IoT, Financial, Gaming, Healthcare, etc) that we can't get from existing cloud offers or outside the Cloud?

A new TSC Task Force was kicked off on January 20th, 2021 in order to define ONAP added-value for Enterprise Business. This session is an opportunity for the new ONAP TSC Task Force to collect feedback from a broader audience (Network Operators, Network Function Vendor, Infrastructure Vendor, Enterprises, etc).

Slides & Recording

Deck: LFN_ONAP_Enterprise Business_V2.pdf

Recording: LFN ONAP Enterprise Business.mp4

Minutes:

- Identify the targeted audience: Not only Carriers but also Cloud Providers, Enterprise Companies, 3rd party vendors, IT Integrators, etc.
- Importance to rework our ONAP Added Values Message for the targeted audience
- Walmart (large retailer in the US) has recently joined LFN
- Initial use case for Enterprise Business: private networks

Action Items

- [ ] Rework our ONAP Added Values Message

- [ ] Follow-up with Google/Walmart and other LFN Members

- [ ] Collect any EUAG Use Cases

- [ ] Contact Enterprise Business Units within our own company

- [ ] Kick Off a Survey

- [ ] Identify owners for each action item identified above 🙂
