2021-02-03 - ONAP: Honolulu Security Updates

Topic Leader(s)

- Amy Zwarico
- Pawel Pawlak

Topic Overview

In this presentation we will review the Python 3 and Java 11 upgrade tasks and exceptions. We will also present a list of commonly used packages that all projects should try to upgrade.

Agenda

Awesome presentation

- Global Requirement: Complete Python 3 and Java 11 updates
- Best Practice: Direct Dependency Upgrades

Minutes

Global requirements for Honolulu release were reviewed by Amy Zwarico and Pawel Pawlak including exception process that should be reviewed at the RC0 milesone (action point to inform David McBride. Vijay Venkatesh Kumar shared his testimony from DCAE migration experience for both Python and Java. Additionally direct dependency upgrades proposals were presented.

Action Items

☐ Pawel Pawlak to ensure that David is aware of exception process for Python 3 and Java 11 updates Global Requirements - so we can have a dedicated RC0 task for final exception review.

☐ Amy Zwarico to provide latest Oparent version update.
