

# 2021-03-01 CVC Meeting Minutes

## Attendees

1. [Lincoln Lavoie](#)
2. [Jim Baker](#)
3. [Trevor Lovett](#)
4. [Yan Yang](#)
5. [Kodi Atuchukwu](#)
6. [Marc Price](#)
7. [Brandon Wick](#)

## Outstanding Action Items

### Task report

Looking good, no incomplete tasks.

## Agenda

- Task report
- [Community Engagement](#)
- [2021 OVP Release Planning](#)
- [Web Portal and Results Submission / Review](#)
- [Any other business](#)

## Minutes

### Community Engagement

- Presentation to TAC - March 10, 2021 - Lincoln / Trevor
- Presentation to Anuket TSC - March 2 - Lincoln Lavoie
- Presentation to ONAP TSC - TBD
- ONAP CNF Task Force - March 2, 2021 - Trevor

### 2021 OVP Release Planning

- Release Goal
  - Does a badge based on the Anuket Q1-2021 (Elbrus) release make sense?
    - We can also raise this question to the TSC / TAC in the next two weeks.
  - What is the current coverage of the RC1 / RC2 tests, does this meet the needs of the operator community?
  - Can we engaged with the EUAG to poll the operator community on the coverage need?
  - Focus on a later release (i.e. first official Anuket release) could
    - Work load testing and badging likely represents the best value to the operator community.
    - RA1 work load profiles are defined, but testing for work loads meeting / falling into those profiles isn't yet defined.
    - Increased requirements set for RA2 coverage.
    - Increase the coverage for cloud native work load testing / requirements
    - Need strong documentation of test coverage to enable communication of badge value to end consumers (i.e. operators)
- [Anuket Assured Re-Launch Release Plan](#)
  - Re-branding of the badge program, given the changes between OPNFV / CNTT / Anuket.
  - Need to add delivery dates to these items, working back from an assumed July badge release (assumes an Anuket release in June).

### Web Portal and Results Submission / Review

- Background: <https://docs.google.com/presentation/d/11jDyCbWYSvpnb3zhb5sVRF9GODnF6n9agEy9ngHaRKl/edit?usp=sharing>
  - <https://lists.lfnetworking.org/g/lf-n-compliance/message/482>
- Open Questions:
  - Where is the repo hosted, gitlab, gerrit, etc?
  - If results are stored in a repo, who has access to that repo?
  - - Can results submissions be made public, show this be required, at what point (submission, approval, etc.)?
    - If limited access to the repo, how are submissions made?
    - Can we leverage git submodules or linked repos to allow for private submissions?
  - Can the Landscapes App including a link to the product info, or only the company info from Crunch-base?
  - If not Landscape, is there something else or similar?
  - Could the badge listing be built directly in a repo as markdown?

### Any other business

- Next Meeting: March 1, 2021
