

2021-03-08: Anuket Assured Meeting notes

Date

08 Mar 2021

Attendees

[Marc Price](#)[Lincoln Lavoie](#) [Jim Baker](#)[Tom Kivlin](#) [Cedric Ollivier](#) [Olivier Smith](#)

Agenda & Minutes

- Trevor Lovett has stepped down as co-chair due to other duties, although he will still be involved in ONAP, and provide a liaison with this group.
- Marc Price will continue as lead for the group for the current period.
- Marc and Lincoln have proposed merging this bi-weekly meeting (OVP2) with the CVC meeting (OVP) so we have weekly meetings across the two initiatives, despite different focus leads
- We are recommending to rebrand the initiative as Anuket Assurance (with badging of Anuket Assured cloud native infrastructure and workload). Lincoln will present this to the TAC this week. We also discussed proposing this to the ONAP TSC
- As a reboot of the group, we discussed the charter and received early validation from Tom and Cedric that our goals are consistent with operators' desires - whereby we will continue towards separate badging of cloud native infrastructure and workload, across requirements proposed and maintained by Anuket, CNCF (telco workgroup), and ONAP - where we will provide an automated mechanism to submit a test, receive a badge (for each of these distinct categories) and maintains results.
- Workstream participants from previous activities are provided below for completeness. We will reengage as we refine delivery schedules for these testing and badging activities in H1 2021.

Work Stream Participants

- **WS01:** Governance/Structure/Mktg, Badging Process and Framework[Primary Owner: LFN CVC] [Lincoln Lavoie](#) [Heather Kirksey](#)
- **WS02:** Cross-project Requirements Alignment (Primary Owner: CNTT - RA2) [Olivier Smith](#) [Bill Mulligan](#) [Fernando Oliveira](#)
