2021-06-02 TAC Minutes

Attendees & Representation (default sort: member first name)

TAC Members and Project representatives should mark their attendance below Non-TAC project reps do not count towards meeting quorum

X = Present | P = Proxy (Indicate in the table with @name for @name

Member	Representing	Member	Representing	Member	Representing	
Alexander Vul	ODIM (sandbox)	Ed Warnicke	FD.io (TAC)	Morgan Richomme	Orange	
Al Morton	Anuket (TAC)	@Eyal Felstaine	Amdocs	Olaf Renner	Nokia	
@Anil Guntupalli	Verizon	Frank Brockners	Cisco		TF (incubation)	
@Anil Kapur	Juniper	Jason Hunt	IBM	Ramesh Nagarajan	Google	
Brian Freeman	AT&T	Kalyankumar Asangi	Huawei	Ranny Haiby	Samsung	
Catherine Lefevre - proxy: Timo Perala	ONAP (TAC)	Lingli Deng	China Mobile	Robert Varga	ODL (TAC)	
ChangJin Wang	ZTE	Marc Fiedler	Deutsche Telekom	Timothy Verrall	Intel	Г
Christian Olrog	Ericsson	Martin Jackson	Walmart	tom nadeau	Red Hat	
Dhananjay Pavgi	Tech Mahindra	Mike Lazar	OPX (sandbox)	Xiaojun Xie	China Telecom	
				@Qihui Zhao	XGVela (sandbox)	

LF Staff: Kenny Paul, Casey Cain, LJ Illuzzi, Brandon Wick, Jim Baker

Others: Amy Zwarico, Nicholas Karimi, Tina Tsou

Agenda

- · Start the Recording
- We will start by mentioning the project's Antitrust Policy, which you can find linked from the LF and project websites. The policy is important where
 multiple companies, including potential industry competitors, are participating in meetings. Please review and if you have any questions, please
 contact your company legal counsel. Members of the LF may contact Andrew Updegrove at the firm Gesmer Updegrove LLP, which provides
 legal counsel to the LF.
 - Antitrust Policy
- Roll Call Today's Quorum == 7
- Action Items Review
- Agenda Bashing
- General Topics
 - Developer & Testing Forum Update
 - Introduction of Committer Representative to the TAC Amy Zwarico
 - TAC attendance at TSC meetings
 - Committer representative election mechanics
 - Discussion: how to resolve communities that have different voting populations for different classes in a TSC? Community picks which voting class or take the broadest class.
 - VOTE: For the committer representative election, the eligible voter population for each community will match that community's voting population for their TSC elections.
 - Whitepaper updates Ranny Haiby
 - LFN-wide security discussion Ranny Haiby Amy Zwarico
- Any Other Topics

Minutes

Introduction of Amy Zwarico

- Active in SECCOM.Policy, and Integration team in ONAP
- Representing the concerns of the committers to the GB
- during introductions Casey Cain noted that TF rep has left the community and a new TAC rep has not been selected yet.

Developer & Testing Forum

- Next week: 07 Jun 2021 10 Jun 2021
- Please register, it's free!
- Registration

Schedule

TAC members attending TSC meetings

- . Intent: Get TAC members to attend the project TSC meetings that are not a part of the daily working routine to gain more perspective
- Casey CainTo share out the meeting schedules for all the TSC meetings to facilitate TAC member drop-ins

LFN-wide Security

- Ranny Haiby On-going need for security best practice exchange for all LFN projects
 - Perhaps a forum for on-going dialogue on security topics?
 - Informal engagements not a requirements generation body
 Also need a unified LFN messaging about security
- Amy Zwarico Great idea ONAP experience has given some best practices
 - Security includes additional work for all project teams
 - O Getting LFN wide approaches to security would be useful
 - Security requirements are a part of every release
 - O Some interdependencies between projects exist so uniform approaches are important (eg. ONAP and ODL)
 - o EVERY component of ONAP pulls in other upstream code many external dependencies
- Brian Freeman Solar Winds was a supply chain attack so treating all the attack surfaces and supply chain is essential
 - A TAC recommendation would be useful to help establish the minimum acceptable
 - ° The component list is long: MariaDB, K8s, etc. all have extensive SW BOM
- Next Steps
 - Proposal: Start with a mailing list and wiki space for sharing security tools/processes
 - O Morgan Richomme A TAC recommendation on basics would be useful
 - Build/publish docker containers should be more automated with more scanners as provided by LF IT
 - Claiming security when not being thorough is worse than not claiming/doing anything.

Committer representative election mechanics

- How to enable communities that have different structures than just committers/contributors?
- · Proposal: Each community provides the list of eligible voters for the committer representative election
- RESOLVED: The TAC agrees that the eligible voter population for the Committer Representative shall match that community's voting population for their TSC General Elections.
 - Vote: https://wiki.lfnetworking.org/x/hoRXAw
 - o #agreed
- Feedback:
 - o Al MortonEmail discussion was supportive of community designated voter population
 - o Ranny Haiby No perfect solution error on the side on inclusivity
 - Jason Hunt Agree allow communities to designate the voter pool per community
 - Jason Hunt Multiple voting populations should be MORE inclusive (use the largest population)
 - Brian Freeman If they can vote for TSC members then they can vote for the committer representative
 - Kenny Paul ONAP and Anuket have broad inclusion in elections. ODL TSC has two classes: committers AND active community members. FD.io - no data
 - o Brian FreemanAll populations that can vote for general TSC seats, also can vote for the committer representative

Action items

- Kenny Paul create Ifn-security list 04 Jun 2021
- Ranny Haiby create LFN security space on wiki 16 Jun 2021
