

2021-06-10 - ONAP: CCSDK/SDNC - ODL Decoupling

Topic Leader(s)

- [Dan Timoney](#)

Topic Overview

30m, [Dan Timoney](#)

In this session, we will discuss work under way within the ONAP CCSDK and SDNC projects to "decouple" our code from OpenDaylight. The goal is to allow ONAP users the flexibility to deploy CCSDK/SDNC with a newer (or older) OpenDaylight release than the release used during ONAP release development.

Slides & Recording

Slides : [Presentation slides \(PDF\)](#)

Session recording : [Session recording \(mp4\)](#)

Agenda

- Overview of CCSDK/SDNC Architecture
- Discussion of work done to date
- Discussion of work left to do
- Open discussion/invitation to participate
