This session is to introduce the survey drafted by LFN projects Anuket and XGVela together.  Some of the key objectives of this Survey are:

1. To understand the state of the industry and trends.
2. Collect the organization's input to identify
3. Prioritize the Categories and the set of Platform Services that should be provided by the PaaS.
4. Understand the integration challenges
5. Collect inputs on the software tools, products and services that are used or intend to use for each of the Platform Services.

We would discuss the details of the topics and questioner and the next course of action.
