

2021-06-10 - Anuket: RA2 status and next steps

Topic Leader(s)

- [Riccardo Gasparetto Stori](#)
- [Gergely Csatari](#)

Topic Overview

45 min | [Gergely Csatari](#) [Riccardo Gasparetto Stori](#) | CET, EET

Let's review where are with RA2 and what will be our targets for Lakelse release.

Slides & Recording

- Live Interactive Session

2021-06-10 - An... next steps.mp4

Anuket June 202...um - RA2 v1.pdf

Agenda

No presentation

- Retrospective of Kali for RA2
- Plans of RA2 for L release

Minutes

- Backlog for Lakese
 - Alignment with RM
 - Edge Cloud
 - High level description and finding out if there is anything extra what is needed for Edge Cloud support
 - SFC
 - An enhancement pr is under review what brings lots of enhancements
 - Let's check if the final SFC chapter is applicable for RA2
 - Security
 - Explicit list of supported API-s and Kubernetes objects
 - Multitenancy, workload isolation and Namespaces
 - Sync SIG Features tables with specs
 - How to manage the application dependency of different CNI multiplexers
 - There is no common annotation for CNI multiplexers
 - Anuket should provide a way to to consume the interfaces in an infrastructure agnostic way
 - CNF packaging
 - We should reuse the CNF packaging format the ONAP community is working on
 - ServiceTypes/NodePorts/LoadBalancers
 - Chapter 6
 - Add a note that it is draft in Kali release. It lists the most obvious features, but misses some features required by Kali release of RA2
 - Finish the work on Lakese release
