

EUAG 2021-06-22 Meeting notes

Date

22 Jun 2021

Attendees

LF Staff: [Jim Baker](#) [Brandon Wick](#)

Committee Members: [Randy Levensalor](#) [Lei Huang](#) [Scott Blandford](#) [Beth Cohen](#)

Proxies:

Guests: [Yuhan Zhang](#)

Agenda

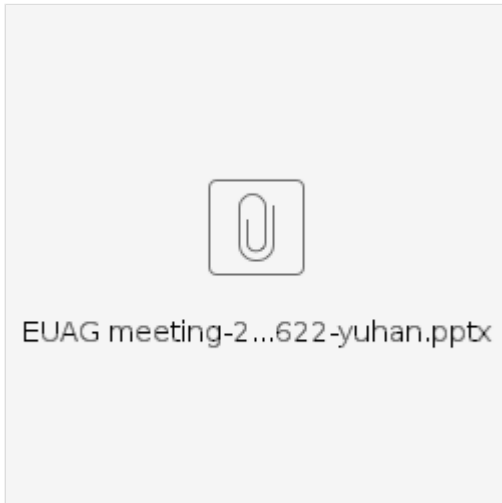

- Start the Recording
- [Antitrust Policy](#)
- Agenda Bashing (Roll Call, Action Items (5 minutes)
- General Topics
 - AI/ML white paper update- [Beth Cohen](#) @Yuhan Zhang [Lei Huang](#)
 - AI data & model sharing project (follow-up) - [Lei Huang](#) [Jim Baker](#)

Minutes

Anuket update moved to 06 Jul 2021

AI/ML White Paper Update [Yuhan Zhang](#)

- Target date to publish the white paper - ONE Summit - Oct 2021
- More contributors sought

- Next steps:
 - [Yuhan Zhang](#) to integrate and upload [Intelligent Networking White Paper_v1 - yh.docx](#)
 - Develop review and input from other EUAG members of survey findings and conclusions
 - More arguments on the importances of AI/ML in networks
 - Need a way to do shared data sets across operators for training models

AI data and model sharing

- Development of the data sharing process
 - Agree on the specific use case
 - Each operator would need to agree on a data definition and clean their data for a shared dataset
- Anuket AI/ML has a community interest - [ONE TIME meeting](#) [meeting](#) 28 Jun 2021 at 1300 UTC
 - Standing meeting: [Fridays at 1400 UTC](#)
- Invite [Sridhar Rao](#) to EUAG for 06 Jul 2021

Anuket Intro [Beth Cohen](#)

- Need EUAG support in a few areas:
 - Major operators contributors: AT&T, Telstra, Vodafone, Verizon, China Mobile

- Merger of CNTT (2 years old) and OPNFV (5 years old)
 - OPNFV focus is a create a testing and badging system for both infra and network functions
 - CNTT was created to get operators to agree on infrastructure definitions
 - Partners with GSMA to publish specs
 - Single reference model with multiple reference architectures (containers and virtualized environments)
 - Reference implementations are developed and verified by a reference conformance set of tests
- New badging being developed: Anuket Assured
 - This is where the EUAG help is needed
 - Lead off with getting operator alignment THEN engage the vendors by requesting badging of their product offerings
- This is an attempt to commoditize infrastructure
 - Infrastructures is NOT a differentiating factor for network operators
- Questions/Answers
 - What are the first items for EUAG to address?
 - Support the Anuket Assured badging program.
 - Are there specific requirements for badging?
 - Cycle of improvement
 - Review the RA definitions - RA1 [Pankaj Goyal](#) and RA2 [Riccardo Gasparetto Stori](#)
 - Offline discussions and plan for a joint meeting with Anuket
 - Couple the topics on testing?

Action items
