2021.r1 Release

- Release Merge Request: https://gitlab.com/lfnetworking/cvc/anuket-assured-docs/-/merge_requests/2
- Lincoln met with the RC2 / RI2 team last week.
 - They agreed to review the materials for this MR (has not been done yet).
 - They asked a question about plans for how long each program / badge would remain "in-force", because this then require they maintain that release of the test tools for the duration of the badge.
 - It's difficult to answer this now, without knowing how quickly the the program releases will occur for AAP.
 - ONAP should generally support 2 to 3 releases ([Kanagaraj Manickam](#) to check / confirm).
- Missing Items ([anuket-assured-docs/releases/2021.r1/README.md](#))
 - 3:FIXME: Update release number above.
 - 59:FIXME: Add assumptions for cloud Native Infrastructure badge. - [Olivier Smith](#)
 - 63:FIXME: Add assumptions for CNF badge. - [Olivier Smith](#)
 - 135:FIXME: Check the below for how to refer to release 1 vs release 2 - [Lincoln Lavoie](#)
 - 208:FIXME: Need to confirm what stress testing is included in Anuket RC 1. - [Lincoln Lavoie](#)
- Results information model
 - [Test Results Information Model](#)
- Results Sandbox
 - [Lincoln Lavoie](#) will try to prioritize this for later this week, so there are materials to review for the next CVC meeting.
- Landscapes Integration
 - Need an update from [Heather Kirksey](#) on where the LFN staff is with the Landscapes integration work.
- Initial participants
 - How to promote to the initial participants?
 - Dry run participants?
 - [Lincoln Lavoie](#) to confirm with [Heather Kirksey](#) and [Brandon Wick](#) what the launch plan would be, and if initial participants would have access to, or be included in, a press release, etc.
