Topic Description

30m, [Yogendra Pal](#)

8am ET

Orchestrating Magma using EMCO and ONAP CDS

Topic Overview

In this session, we will show how Magma core (Access Gateway(AGW) & Magma controller/orchestrator (NMS)) can be deployed on different Kubernetes cluster. Post deployment of Magma controller and AGW, an automation workflow from CDS will be triggered to illustrate unregister the stale AGW and register the newly brought up AGW with Magma controller.
