- [Konstantinos Kanonakis](#)

Topic Description

45min, [manoj chokka](#) and [Konstantinos Kanonakis](#)

This topic is to propose and discuss a high level overview of the scale architecture by Verizon.

Topic Overview

OpenDaylight Scale Architecture

The present day approach is not compatible with the micro-services based deployments and cannot be easily orchestrated nor easily scaled.

Hence we have had to rethink the approach with which ODL can be scaled and easily orchestrated.

This topics discuss these issues and addresses them using the Verizon's scale architecture.
