Overview of T-API contributions to T-PCE

Topic Overview

The presentation will give an introduction on T-API and how it is related to open the control of transport networks. The latest contributions in T-PCE for T-API support will be exposed. Connectivity service provisioning over an emulated Optical Network using the T-API service interface will be demonstrated, along with other T-API capabilities (e.g., T-API topology service, T-API notification service...)
