

2022-01-13 - TF: Tungsten Fabric Deployment Walkthrough

Topic Leader(s)

- [Nick Davey](#)

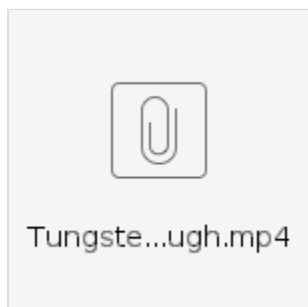

Topic Description

This session will cover two common installation procedures of Tungsten Fabric. Both OpenStack and Kubernetes deployments will be covered, and demonstrated to show how new users and developers can get their own TF labs up and running.

Topic Overview

Tungsten Fabric is an SDN solution for OpenStack and Kubernetes. This session will walk through how to install TF in these popular orchestrators, while covering key architecture and lifecycle management concepts of the system.
