Discussion on a proposed ONAP presentation in the Multi-SDO AN open meeting series

Topic Overview

Background:

TM Forum sent the **Multi-SDO Autonomous Networks (AN) Formal Liaison** to ETSI, GSMA, ONAP, NGNM, 3GPP SA5, CCSA, IEEE, IETF, ITU-T.

"... we have an opportunity to share, align and harmonize the collective achievements of the leading SDOs to make Autonomous Networks a successful business opportunity and to fully enable digital transformation."

The proposal was initially to create jointly authored M-SDO documents, but based on the feedback from several organizations that seems infeasible. The present proposal is to move to a single series of open meetings during 2022.
