2022 LFN DTF Workshop April

Welcome to the LFN DTF Workshop

- **Schedule** – **Zoom links are here.**

The LFN DTF Workshop is a special follow-on event from the January LFN Developer & Testing Forum and will be focused on continuing cross-project collaborations. The event will be held virtually March 14 & 15 and will use a combination of online tools to create a productive and interactive virtual meeting environment. See the schedule at the link below and attend the sessions of most interest to you.

This workshop is intended to be deeply interactive on CNF, orchestration alignment, and community documentation and tooling topics.

Facilitation Ground Rules

- Each Session should have a clearly defined objective and scope statement.
- When offering your thoughts, please be concise. We ask you avoid monopolizing the conversation.
- When someone is speaking, please allow them to complete their thoughts.
- While debate is an underpinning of growth, decorum is the foundation of progress.
- The Facilitator/Presenter and Moderator will work to keep the discussion aligned with objectives and scope. Discussions that are not in alignment with objectives and scope will be deferred.
- The Moderator will record the deferred topics in a topic "Parking Lot" to be addressed by assignment to community representatives at the conclusion of the session.
- Each session should be served by a scribe

We really look forward to engaging with the community on these strategic topics.

The zoom links are in Team Up calendar under the schedule link below.
