- Updates on Azure blob storage cost as been shared with LFN - 5\$/month.
- General Topics (cover as needed)
 - Use Cases
 - Roadmap
 - Project structure
 - Governance
 - Technical Steering Committee
- PR's
 - <https://github.com/l3af-project/governance/pull/19>
 - <https://github.com/l3af-project/l3afd/pull/53>
 - [Make xdp_root and ratelimiting compile for windows by dthaler · Pull Request #17 · l3af-project/eBPF-Package-Repository \(github.com\)](#)

Minutes/Updates

- LFX Security Overview and Getting Started
 - June 15th completion date
 - Going to vote on whether to use LFX or not.
 - Vote: 3 yes. Passed.
 - Go is supported, C and C++ are not supported.
- LFN Status of storage for storing eBPF package repository artifacts
 - package repo: UI, review board comments.
 - Need to build an app.
 - Will need a VM for this to run.
 - Just the storage is \$5/month
 - No VM expenses
 - How far along in the timeline till we need VMs?
 - Need to do some design to understand how many VMs.
 - Recommend: AKS
 - Projection for growth?
 - We need to see the cost of the whole thing.
 - This is what we are trying to build, this is what it will cost...
 - Is there a doc on this?
 - If not, we need to write one.
 - With an arch diagram
 - Requirements, etc.
 - Does LFN have compute capacity?
 - TLS support needs blob storage.
 - Full arch needs doc
- PR #19
 - Requested review - approved.
- PR #53
 - Why do generated files need to be checked in?
 - They don't. Will rewrite the Makefile to generate the file on the fly.
- PR #17
 - Second step in getting I3AF funning on Windows
 - xdp_root program and app are building
 - Makefile vs Cmake lists.
 - Needs reviewers

Action Items

Future Agenda Items

- Proposal that the community receive an overview on license and export compliance scan tools. Queue this up for 04/20?
