2022-06-15 - ONAP: Security of CDS py-executor while using 3rd patry scripts

Topic Leader(s)

- Marek Szwakiewicz

Topic Description

30m, Marek Szwakiewicz

How python can be abused by malicious (or buggy) CBA and what we can do to make it more secure in the future.

This talk is mostly a WHAT IF about CDS executors and how we can evolve and expand the capailities while securing the approach we take.

Topic Overview

TBD

Slides & Recording

Demo / Informational (non-interactive)
