

# 2022-05-23 CVC Meeting Minutes

## Attendees

1. [Olivier Smith](#)
2. [Kodi Atuchukwu](#)
3. [Marc Price](#)
4. [Scot Steele](#)
5. [Yan Yang](#)
6. [Sandra Jackson](#)
7. Absent
8. [Lincoln Lavoie](#)
9. [Kanagaraj Manickam](#)

## Open Action Items

x

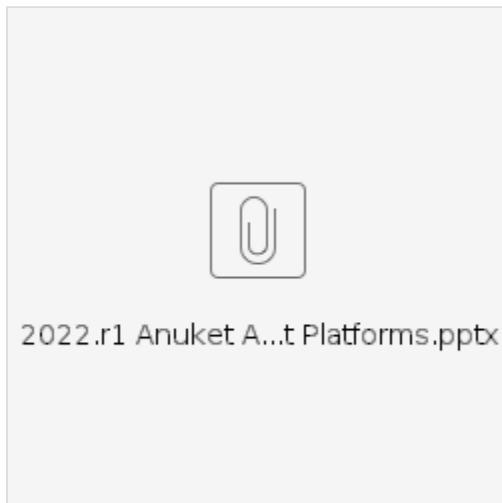

## Task report

Looking good, no incomplete tasks.

## Agenda / Minutes

- **IMPORTANT REMINDER** - There will be **no meeting** next week (May 30th) due to a public holiday in the US. Our next meeting will be held on June 6th at a new time (1 hour earlier than normal). [Sandra Jackson](#) will be sending new invitations later this week - be sure to accept.
- We started the meeting by reviewing the Open Action Items list
- Reviewed 2022.R1 planned badge categories and testing platforms. [Olivier Smith](#) drafted a simple diagram meant to provide a high-level overview. He will continue making updates to the diagram so that we all have a good understanding of the badges we expect to offer based on the "M" (Moselle) release, what the requirements/tests actually are verifying, and which testing platforms are used. For anyone looking for details on the M release schedule you can find it here: [Moselle Schedule - Anuket - Anuket](#)

The following diagram is **work in progress** and requires further discussion:

[Olivier Smith](#) to add an action item for the group to define the following related to each badge. We are looking for a high-level understanding, not a deep dive on all the tests.

- What do AAP Infrastructure badges verify?
  - R1 -
  - R2 -
- What do AAP Workload badges verify?
  - VNF -
  - CNF - Not defined today but might include verification of 1) Cloud Native Best Practices, 2) Interoperability with R2 specified Infrastructure and 3) Compatibility with ONAP.
- What do AAP Labs badges verify?
  - ?
- [Olivier Smith](#) mentioned that we will use Issues in Gitlab ([Development](#) · [Boards](#) · [Ifnetworking](#) / CVC / [anuket-assured-docs](#) · [GitLab](#)) for anything that has a direct impact on our program documentation, and we will use Action Items in the weekly minutes for everything else.

## Any Other Business

- [Scot Steele](#) - Asked if we want to have someone sponsor a discussion at the June DTF?
  - This would probably be a discussion that multiple groups would want to participate in.
  - Scot is doing something around RC2 (readout) and have dialogue specific to workloads
  - Olivier - Is there a way to support Scot or work together on the topic of badging?
    - There's time on the schedule, where we could add another session and get CNCF and Anuket to discuss.

- [Kodi Atuchukwu](#) has offered to help [Olivier Smith](#) in running a session on "Finding Common Ground" specific to Cloud Native Workloads. The idea would be to dialog around how we collaborate with CNCF, ONAP, and others as it pertains to cloud native workloads.

#### New Action Items

- ✓ Olivier Smith - Work with Lincoln Lavoie to understand more around Anuket Lab badge that is being announced on our website (says coming Q2/2022)
- ✓ Olivier Smith - Coordinate and potentially schedule a DTF session together with Kodi Atuchukwu
- ✓ Olivier Smith - Have a discussion point on our next meeting to clarify what our M badges actually are verifying (see notes in 5/23 Meeting Minutes)
