[Expand panels](#) [Show all details](#) [Hide met & N/A](#)

Projects that follow the best practices below can voluntarily self-certify and show they have achieved an Open Source Security Foundation (OpenSSF) best practices badge.

If this is your project, please show your badge status on your project page! The badge status is: [OpenSSF best practices](#) [in progress 42%](#). Here is how to embed it: [Show details](#)

These are the [passing](#) level criteria. You can also view the [silver](#) or [gold](#) level criteria.

- 
- Group session to fill out form.
  - fixed: New functionality question 1 needs the correct "cut and paste"
  - fixed: Question 3 needs the same fix
  - Look at warnings. Are they addressed?
  - Are all build warnings turned on?
- Next Release - roadmap planning
  - Need a serious look at feature and release cadence
  - Need to grow contributors
  - Leverage the eBPF day presentation for blogpost
  - Release that we can put out on media
  - Highlight Santhosh's L3AF presentation into a blog.
  - Ongoing agenda item.
- PRs:
  - WinZip - go ahead and merge...merged
  - Increase test coverage - added go tests to increase coverage - please review!
    - Please don't check in l3afd as a binary.
  - Integrating with demo
  - If I'm unpriv and I log on to the local machine, then how do we block elevation of privilege?
    - How does l3afd know to not accept the restful request from someone who is not an admin?
    - To update you need to be an admin.
      - Not implemented - must use https to modify stuff from local loopback
        - Make sure that this gets implemented
    - Security vulnerability - unpriv user can get root access by installing an eBPF program.
- Need a separate issue for the prod env?
  - Yes, prod env is not documented and we need to add a README.md for it.
- Action item to file the issue: [Jason Niesz](#)
- June 15th DTF in Puerto.
  - Cancelling this meeting so that we can watch?
    - Discuss next week

## Future Agenda Items
