- Welcome to new attendees
- Release Management Consultation
- General Topics (cover as needed)
 - Use Cases
 - o Roadmap
 - Project structure
 - Governance
 - Technical Steering Committee
- Review PRs

Minutes/Updates

Release Management Consultation -

• 2 hours in total are needed to complete the consultation/Training

- Hour 1: 08/23
- Hour 2: ?
 - Next Week or a one off(?), closer together is better
 - ° Yes, scheduled.
- Community Release Manager
- 1-2 people from community
 RM for LFN Projects David McBride
 Dedicated RM does not scale No RM is chaos Find a middle ground
 - O Need a stable, effective, repeatable process.
- Projects of projects dependencies
- chat: looks like the current L3AF "release process" (such as it is) is documented at https://github.com/l3af-project/governance/blob/main/docs /RELEASE_PROCESS.md. I'm guessing there are gaps we will hear about in this presentation.
- L3AF is a project of projects: L3aF-arch, l3afd, epf program repo
- Interop
 1 proj w/mult releases: for eg: Linux/Windows.
- MUST adhere to release schedule
 L3AF project: New, release every 10-12 weeks
 - Currently no releases
- More mature longer release periods
 - Linux kernel 4 times a year
- Signoff process
 - o TSC is not necessarily responsible for regular release signoff
- Use the principle of minimum viable governance
- · What about the PR around release?
