Jay Sheth	Walmart

LF Staff: [LJ Illuzzi](#)

Agenda

- [LF Antitrust Policy](#)
- Meeting note taker
- Welcome to new attendees
- Release Management
- LFN 2023 Budget Cycle
- General Topics (cover as needed)
 - Use Cases
 - Roadmap
 - Project structure
 - Governance
 - Technical Steering Committee

Minutes/Updates

Release Management Consultation- The presentation collateral from 08/24 and 08/31 have been posted to the L3AF Wiki: [Release Management](#)

- Community input by 09/16

- Should we do the remaining 30 mins of release management presentation?
 - Dave: Perhaps the slides are sufficient.
 - Jason: +1, Santhosh +1, Lj +1
- L3AF Release Manager. 2 preferable
 - Santhosh, Jason, Dhivya to serve as Release Managers
- Overall status of release:
 - eBPF for Windows - on roadmap, not in current release
 - On Windows all the tests pass
 - However, L3af does not work on Windows
 - Need to build up tests - must precede coincide with L3AF for windows
- L3AFd release: mTLS support: <https://github.com/l3af-project/l3afd/pull/96>
 - No specific dependency on Linux distro(?)
 - Supporting libbpf core - taking offline
- Release Planning: <https://github.com/l3af-project/l3af-arch/discussions/39>
 - Assign names or just use numbers
 - Exotic trees(?)
 - Chala: Go with numbers
 - Semver 2.0: <https://semver.org/>
 - Start with 1.0 - backwards compat required until next major release number.
 - API version -schema definition
 - Current schema: v1 (convention)
 - <https://github.com/l3af-project/l3afd/blob/main/apis/routes.go>
 - URI should only use the major version because the version does not change with the API
 - We will start with 1.0
 - eBPF package repository
 - Nothing is changed, but we should have a release
 - We will start with 1.0, however there is no requirement that they be the same
 - Release notes and documentation
 - Need to get started on draft this week
 - Docs were completed as we went
 - Added 2 new APIs
 - Best practices, examples
 - Update swagger docs
 - package repo does not need specific docs for eBPF progs

LFN 2023 Budget Cycle

- Participate in the mentorship program?
- Blob storage
 - What subscription level do we need?
 - Need some infrastructure as well
- IT support
 - We are on the LFX platform
- L3AF.io site
 - We can self-manage it - would have to have a person to manage it.
 - eBPF.io uses netlify - generates previews on each PR
