2022-11 - Anuket: Practice and Plan of Network Intelligent Collaborative Innovation in LFN Thoth

Topic Leader(s)

- Lei Huang
- Yan Yang
- Sridhar Rao

Topic Description

Introduce the practical experience and follow-up plan of Anuket Thoth project in the network intelligent ecological construction.

Topic Overview

In order to realize the ecological construction of network intelligence, LFN Anuket established a new project in Thoth this year called the Network Intelligence Collaborative Innovation Project(NICIP), which aims to explore and jointly build network intelligence scenarios and open data sets. This topic will first introduce the background of NICIP, then introduce the project's current achievements in scenarios and data sets, and put forward project next step plan. We will also explain how to participate in the project in different roles. We hope that through this topic sharing, we can build better intelligent network ecosystem together and explore network scenarios and data empowered by network AI.

Slides & Recording

>
> - Demo / Informational (non-interactive)
>   - You may be asked to pre-record this session which will be made available on-demand.
> - Live Interactive Session
>
> LFN Staff may elect to publish some videos to YouTube. Please indicate here if you do not want your session to be published to YouTube.

Agenda

Awesome presentation

- Project Background
- Introduction of project implementation plan
- Introduction of project achievements - open data sets and competition practice
- How to participate in NICIP
- Project follow-up plan (including Thoth Nile release plan)

Minutes
