

# ONE Summit Technical Project "Office Hours"

We want to give individual projects the opportunity to engage in office hours with the participants of ONE Summit. These half hour slots are an opportunity for more informal or in-depth conversations on the technology and workings of the projects. This time is for projects and those attending the session to use as they wish! Come prepared to ask/answer questions and learn/teach about the important open-source technologies creating the networks of today and tomorrow!

These office hours will take place in the central lounge area of the show floor. There will be a screen with laptop input available if project representatives want to use slides as part of the conversation. Please note that we won't have technical support available if there are any projection issues. We also invite and encourage all the project reps participating to spend some time in this central lounge area during the event booth crawl on Tuesday evening for even more spontaneous and informal discussion of our amazing open source communities.

Time slots are are US Pacific and made available to community members on a first-come, first-served basis. The scheduled follows the ONE Summit Available Slot session schedule, including break and transition times. When it's your time, please be mindful of the shared nature of this space.

You must be logged into the LFN wiki in order to edit this page.

Day 1, Tuesday 15 Nov 2022	Office Hours Topic	Presenter (Use @macro)	Brief Description
