2022-11 - ONAP: ONAP In Production: Performance and HA considerations

Topic Leader(s)

- Amar Kapadia
- Rajendra Prasad Mishra

Topic Description

30m, Rajendra Prasad Mishra

Performance and HA considerations for ONAP components in production.

Topic Overview

In this session, we will present the performance and HA considerations of ONAP components. This will be a key requirement for any production deployment.

- We will describe typical HA setup for Kubernetes on prem and on the cloud.
- We will talk about general changes needed for High Availability deployment of ONAP components.
- We go over the details of CDS & Camunda changes for deployment under HA setup.
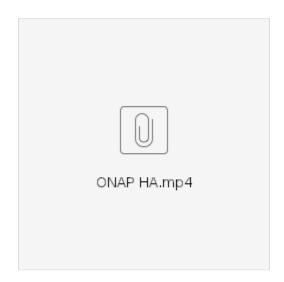

Slides & Recording

Please indicate your session type in the blank space below and then remove this Info field.

- Demo / Informational (non-interactive)
  - You may be asked to pre-record this session which will be made available on-demand
