# 2023-02 - Nephio: Birds of Feather Session: Leveraging EMCO Code to Accelerate Nephio

**Topic Leader(s)**

- Amar Kapadia
- Sandeep Sharma
- Nadathur Sundar
- Piotr Matysiak

## Topic Description

*30m, Amar Kapadia*

EMCO has broken new ground with a number of innovations. However, it is in maintenance mode. In this session we want to explore if any of the code can be used to accelerate Nephio.

## Topic Overview

EMCO has broken new ground with a number of innovations. However, it is in maintenance mode. In this session we want to explore if any of the code can be used to accelerate Nephio. Some ideas are:

- Placement controller
- Istio controller
- HPA (hardware placement awareness) controller
- Temporal workflow controller
- Helm parsing

The above list is not comprehensive. There will be no slides or presentation. The idea is to have an open discussion on this topic.

## Slides & Recording

Birds of F...o.pptx.pdf

2023-02...BOF.mp4

## Agenda

Awesome presentation

- Innovations in EMCO
- How to leverage EMCO innovations for Nephio
