Minutes/Updates

- Tech & PRs
 - Tail calls: Hash size discussion - Can we have atomic updates of a `bpf_prog_array`? (No, but it is not documented other than source code)
 - can hash sizes be other than 4?
 - Yes: <https://blogs.oracle.com/linux/post/bpf-in-depth-communicating-with-userspace>

- Need to figure this out. We will use hash maps a lot. Cilium allows only one tail call
 - Need to use xdp_dispatcher (no tail calls or prog_array needed) or get the Linux kernel fixed
- [February D&TF](#) - there is a discussion to potential move the virtual event from February to March. Each project TSC is being asked for input /thoughts.
 - March would give us some breathing time
