LF Staff: LJ Illuzzi

Agenda

- LF Antitrust Policy
- Meeting note taker
- Welcome new attendees
- Issue discussion/Dev updates
 - Lead off with RBAC https://github.com/l3af-project/l3af-arch/discussions/57
- Release Management (Dhivya)
- LFN Developer & Testing Forum June 2023 Review calendar/L3AF Schedule
- Optimising Traffic Mirroring AOB

- · General Topics (cover as needed)
 - Use Cases
 - Roadmap
 - Project structure
 - Governance
 - **Technical Steering Committee**

Minutes/Updates

- Issue discussion/Dev updates
 - o L3AF R2
 - RBAC https://github.com/l3af-project/l3af-arch/discussions/57
 - Option 1: RBAC framework using x.509 PKI Certificate Attributes
 - Not every CA will issue those types of certs (w/usernames)
 - Option 2 OATH
 - O No work required. Just consume already existing resources.
 - Many enterprises already using it.
 - ex: Windows Active Directory
 - Option 3. Digital Signature based Authorization with mTLS
 - Minimal overhead.
 - Partly extensible. Partly standards compliant.
 - Protocols mature, framework not so mature.
 - Option 4. SHA256 Hash based Authorization with mTLS
 - Don't want l3af to be the actual auth service.
 - Custom implementation
 - We don't want to take ownership by building our own RBAC
 - Building an e2e RBAC does not align with L3AF goals
 - Also managing the RBAC lifecycle
 - Enterprises should use their own control plane to manage L3AFd
 - Supporting only 2 roles at first is okay, but we have to be extensible
 - Most enterprises will have central control.
 - · Leave it up to them.
 - Option 2. mTLS with OAuth 2.0 Client Authentication, but:
 - o If nobody is going to use anything other than read/write then we do not need to build RBAC now.
 - We will document how to integrate RBAC option 2.
 - Document how L3AFd could integrate with the above
 - feat: introduce interface-based data types #229 https://github.com/l3af-project/l3afd/pull/229
 - Standardize to open source.
 - Finish most of R2 PR then merge this.
 - Approach agreed upon.
 - Update configs from command line argument #242 https://github.com/l3af-project/l3afd/pull/242
 - Please review
 - Update native loading of root programs #245 Loading XDP and TC program blockers
 - - https://github.com/l3af-project/l3afd/issues/191
 - Waiting for Intern
 - Build fails(?) Missing package.
 - Workaround by making conditional dependencies where Linux specific calls are only used on Linux builds.
 - https://github.com/florianl/go-tc/issues/17 Need to update our issue.
 - L3AFD v2.1
 - L3AF on Windows
 - LFN Mentorship Program for L3AF on Windows
 - Set of milestones next week
 - o DT&F
 - 5 am PST L3AF project update
 - Shankar 5G uF
- Release Management
- LFN Developer & Testing Forum June 2023 June 6-8, 2023. Virtual event
 - Review calendar/L3AF Schedule
 - Link to L3AF topic submissions:
 - Topics Submission Page
 - Virtual D&TF session guidelines
 - Reminder to Register
 - Best place for marketing the project- this is how we grow the community within LF/LFN
 - Question: should June 6 TSC meeting be canceled so the community can attend D&TF? (many LFN communities will cancel TSC meetings that week in lieu of D&TF).
- Optimising Traffic Mirroring (Arunkanth) Link

Any Other Business

Action Items

- Dhivya R Release Management Plan- add milestones for testing, documentation, package. What else is needed from a delivery standpoint?
- LJ Illuzzi Open SSF Scorecard. Is it visible on LFX Security
- ✓ LJ Illuzzi Draft LFN Board response to eBPF standards

Future Agenda Items

Start with

• RBAC https://github.com/l3af-project/l3af-arch/discussions/57
